Box Structure and Assembly

The box is designed with a central blue panel and white side panels. The lid and base are also blue. The box is assembled by folding the side panels and the lid and base flaps.

The box is designed to be easy to open and close. The lid is hinged to the top of the box, and the base is hinged to the bottom of the box.

The box is designed to be sturdy and durable. The side panels are reinforced with a blue material, and the lid and base are made of a thick, rigid material.

The box is designed to be easy to handle and transport. The lid and base are hinged to the top and bottom of the box, respectively, allowing the box to be opened and closed without the need for tools.

Box Dimensions and Weight

The box is designed to be compact and lightweight. The dimensions of the box are approximately 10 cm x 10 cm x 10 cm, and the weight is approximately 100 g. The box is made of a lightweight material, such as cardboard or plastic.

The box is designed to be easy to store and transport. The lid and base are hinged to the top and bottom of the box, respectively, allowing the box to be collapsed for storage or transport.

The box is designed to be easy to use. The lid and base are hinged to the top and bottom of the box, respectively, allowing the box to be opened and closed without the need for tools.

The box is designed to be easy to handle and transport. The lid and base are hinged to the top and bottom of the box, respectively, allowing the box to be opened and closed without the need for tools.

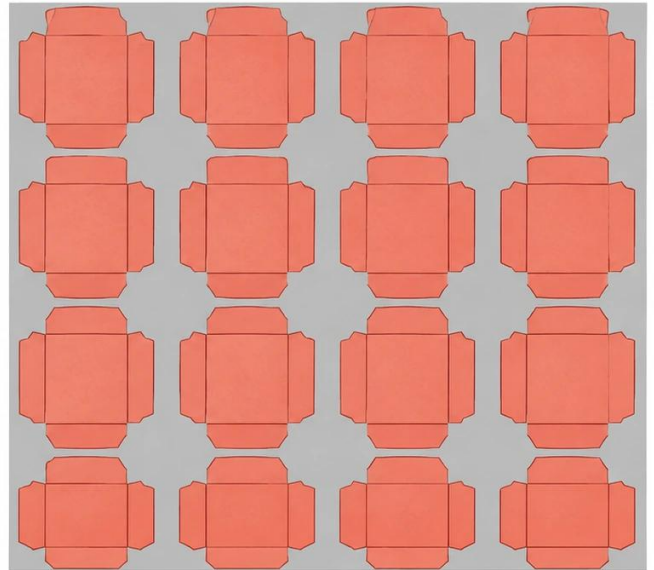

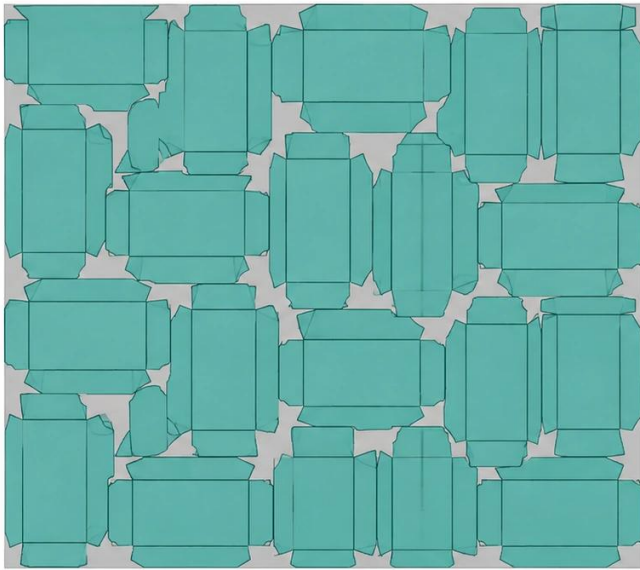

The box is designed to be easy to handle and transport. The lid and base are hinged to the top and bottom of the box, respectively, allowing the box to be opened and closed without the need for tools.
