3. 3D effect

DTF is a new technology that allows you to print designs on fabric. It is a great way to create custom apparel. The process involves printing a design on a special paper, then transferring it to the fabric using heat and pressure. This method is ideal for creating designs with a 3D effect, as the ink is applied in a way that creates a raised texture. The process is also very easy to use, and you can create designs in a variety of colors. The final result is a high-quality, durable design that will last for many washes. The process is also very cost-effective, as you can create designs in a variety of colors and sizes. The final result is a high-quality, durable design that will last for many washes.
